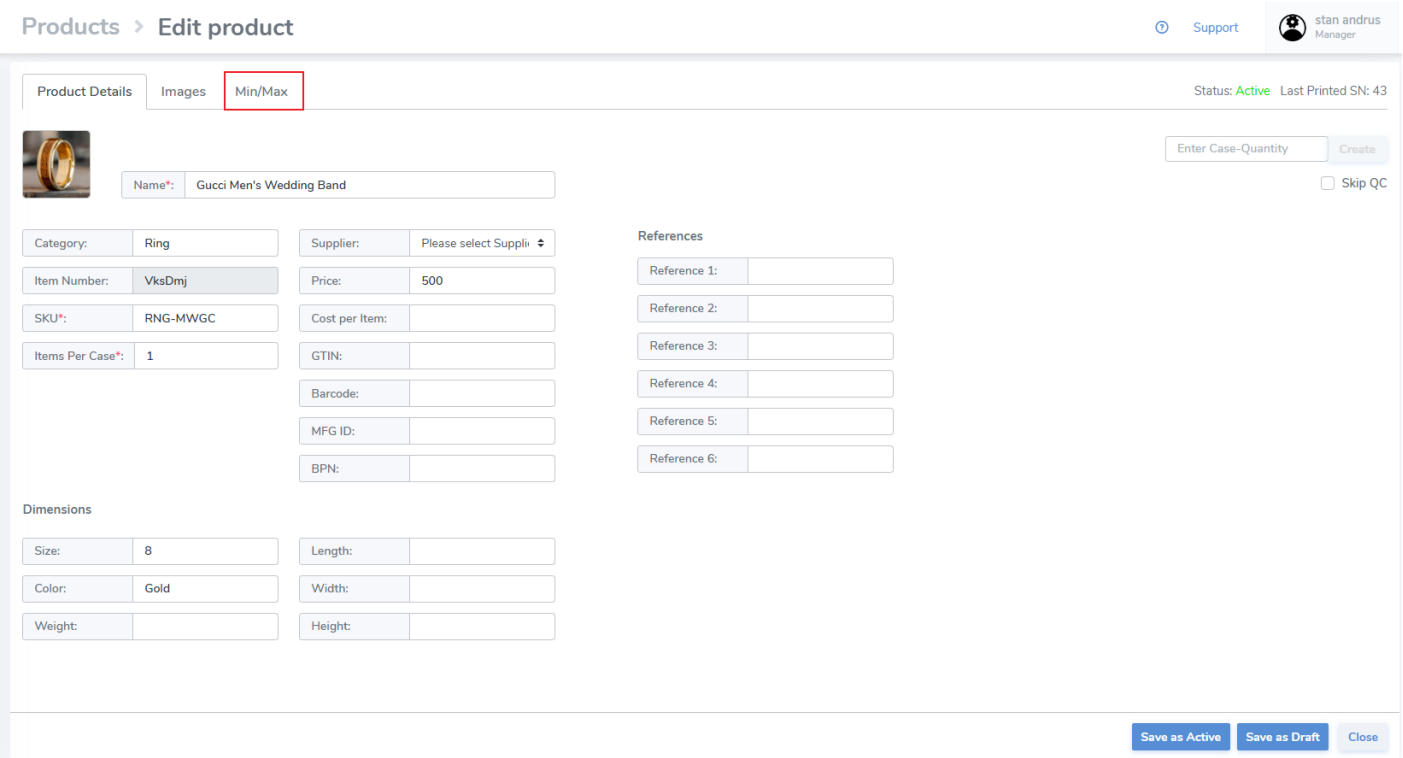
Setting Thresholds

The Calculate Reorder tab allows users to set thresholds for what they wish to have in stock, and allows them to set a par of how much they must restock.

Set Thresholds from Product profile

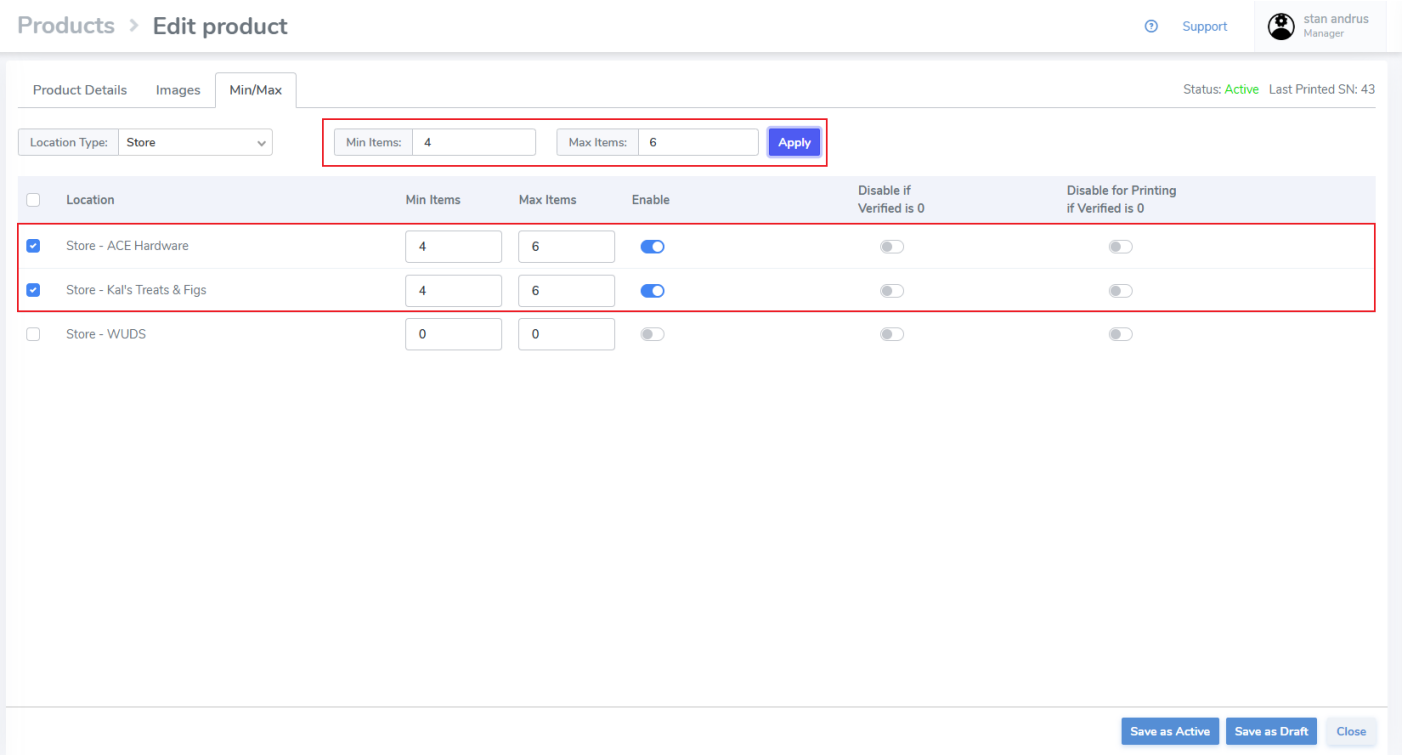
From the Products tab, search for the item you wish to set pars

Locate it and open it



Click on the Min/Max tab

- Choose the Location Type for the location(s) you wish to set thresholds, or choose 'All' to include all entity types
- Click the checkboxes on the left
- At the top enter the Min and Max
- Click 'Apply'
- The quantities will be applied to the location(s) and will be 'enabled'

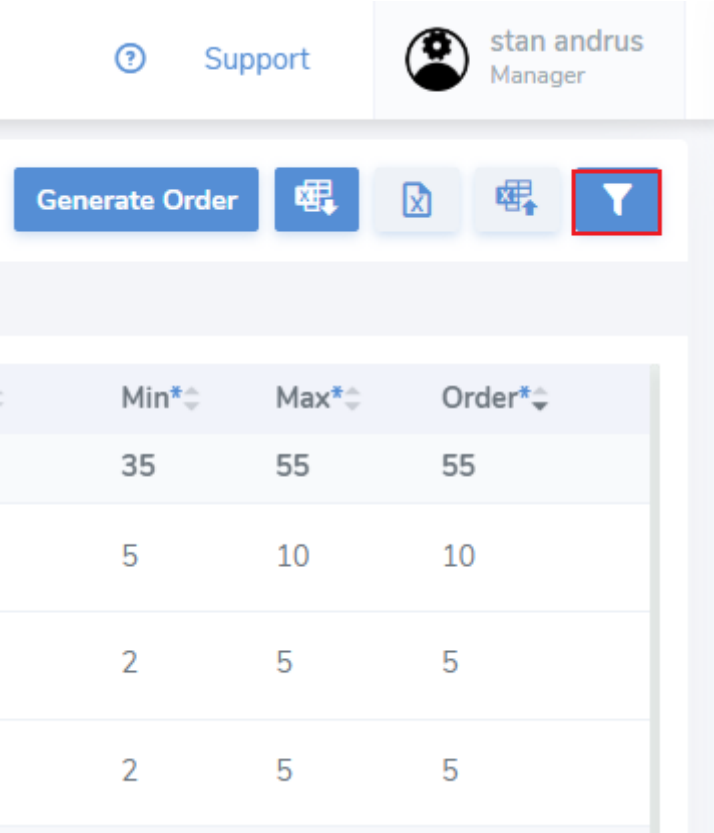


Settings to Disable if Verified is 0 and Disable for Printing if Verified is 0 will be explained in a later article.

- Click "Save as active"

Set from Calculate Reorder

To quickly identify items that have not been assigned a Min & Max click the filter icon



This will open the side filter menu

1. Supplier - Set the supplier filter if products have been assigned a supplier to quickly filter them

2. Limit the items
