

Shopify: Compare & Sync

The following article is a part of a [Legacy Audit](#) system that will eventually be fully replaced a [new Audit workflow](#). It describes the process of comparing and syncing your Simple RFID inventory to Shopify.

Legacy mode can be enabled or disabled by following the instructions here: [Audit Legacy Mode](#)

Comparing

On the Simple RFID app in Shopify, navigate to the **Compare On Hand** page

The screenshot shows the Simple RFID app interface. At the top, there's a navigation bar with 'Simple RFID' and a menu with 'Compare On Hand', 'Auto Sync History', 'Orders & Returns', 'Print', 'Never Printed', 'Products', and 'Settings'. Below the navigation bar, there's a status section with 'Last Audit Date: 03/02/2026 08:59:00 AM', 'Last Scan Date: 03/19/2026 12:07:48 PM', 'Last Sync Date: N/A', and 'Last OnHand Load: 03/26/2026 10:11:24 AM'. A 'RFID vs. On Hand' button is highlighted. To the right, there's a checkbox for 'Display never printed/scanned products in Compare On Hand' and buttons for 'Get Report', 'History', 'Sync', and 'Print'. Below this, there's a search bar and a 'Mismatch(27)' button. A table of inventory items is displayed with columns: Image, Product Name, Sku, Verified RFID, - Fulfilled Orders =, Projected On Hand, and Shopify On Hand. The table contains five rows of product data. A 'Sync' button is highlighted in the top right area of the table.

Image	Product Name	Sku	Verified RFID	- Fulfilled Orders =	Projected On Hand	Shopify On Hand	
			110	0	110	74601	
	Classic Jacket (Size: XL / Color: White)	SKU-00000147	10	0	10	749	<input type="checkbox"/>
	Classic T-Shirt (Size: Medium / Color: Red)	SKU-00000215	4	0	4	3771	<input type="checkbox"/>
	Heavyweight Hoodie (Size: Medium / Color: Red)	SKU-00000015	20	0	20	2810	<input type="checkbox"/>
	Vintage Hoodie (Size: Small / Color: Gray)	SKU-00000083	10	0	10	2070	<input type="checkbox"/>
	Vintage Jacket (Size: Medium / Color: Navy)	SKU-00000039	10	0	10	3431	<input type="checkbox"/>

To load your inventory, select **RFID vs. On Hand**

If you can't find a product, it may be due to the item never being printed and/or scanned. If this is the case, click the "**Display never printed/scanned products in Compare On Hand**" checkbox, and reload the page.

Once your inventory is loaded, you will see each product with a few different quantities:

Verified RFID

The quantity in your Simple RFID inventory

Fulfilled Orders

Shopify orders that were fulfilled since the last Simple RFID audit

Projected On Hand

The number that will be compared to your current Shopify count

Shopify On Hand

The quantity in Shopify

The **Mismatch** section will show every product that is mismatched between Simple RFID and Shopify

There are three possible types of mismatches:

Deflated

Projected On Hand is higher than Shopify, possibly because items have been sold or transferred

Inflated

Projected On Hand is lower than Shopify, possibly because tags haven't been printed or scanned

Out of stock

Projected On Hand is zero, possibly because tags haven't been printed or scanned

After verifying that a product has the correct quantity in the **Projected On Hand**, you are ready to sync.

Syncing

On the far right of each product, there is a checkbox. Selecting this will add it to the sync list. To sync the products, click the **Sync** button on the top right.

You can also sync a product individually by pressing the **Sync** button to the left of the checkbox

You now know how to compare and sync products from Simple RFID to Shopify!
