

Select Location

How to select a location

Note: A user may be granted access to a specific location(s), or have access to all locations

Select Location

Upon first logging in, you will be prompted to select a location

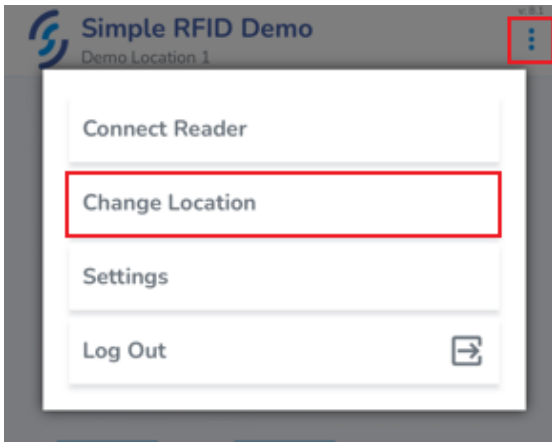

The screenshot shows a mobile application interface for selecting a location. At the top, the word "Locations" is displayed in a bold, grey font. Below this, there is a list of location options, each in a white box with a light grey border and a shadow. The options are: "DC", "Bin 1", "Bin 2", "Demo Location 1", "Demo Location 2", "Headquarters HQ", and "Westlake Warehouse". Below these options, the word "STORE" is displayed in a bold, grey font, followed by a horizontal ellipsis "..." indicating more options are available.

Once the location is selected it will appear at the top of the screen

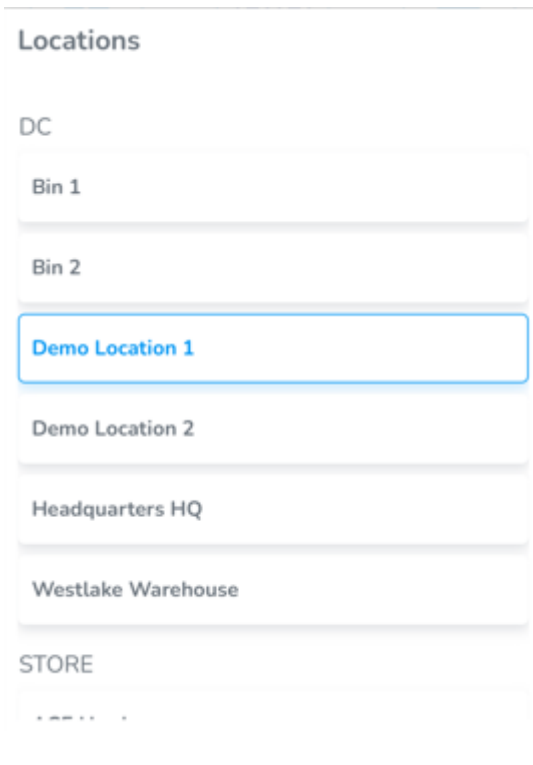

To change location, click on the ellipsis in the top right corner of the screen, then click **Change location**

If you don't see the **Change Location** option, it may not be available from the screen you're viewing. Press the Back button (or Simple RFID logo) to go back to the dashboard, then try again.

The currently selected location will be highlighted. Tap another location to switch.
