

ApparelMagic: Products

If you haven't connected ApparelMagic with Simple RFID yet, follow the instructions here:

[ApparelMagic: Setting up the integration](#)

Overview

Access the ApparelMagic integration from the navigation sidebar:

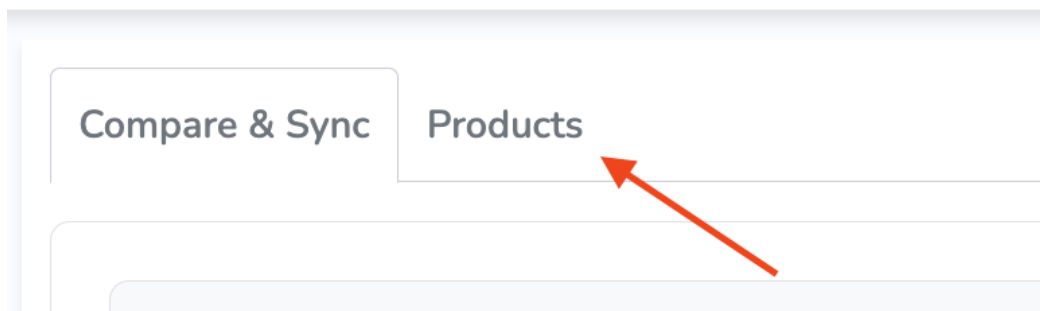

Integrations

Apparel Magic

By default, you'll see the Compare & Sync view. To import products, open the **Products** tab at the top of the page:

Integrations > Apparel Magic

In the Products tab, you'll see your ApparelMagic products listed. From here, you can search by style name (full match) to find specific products:

<Page 1>

Sync Status describes the import status of each variant.

- **New** means the variant has not been imported yet.
- **Existed** means the variant already exists and is up to date in Simple RFID, so there's no need to import.
- **NeedUpdate** means that some product information has changed, so the product needs to be imported again with the new info.

Import Products

There are a couple of different approaches you can take to import products.

Import All

Using the **Import All** button will attempt to import all of your products from ApparelMagic to Simple RFID. This is generally recommended when first setting up the integration rather than copying products individually.

Import Selected

You may also wish to select a specific product or variant to import, especially after making changes to the product information in ApparelMagic. Use the checkboxes on the right side of the products/variants to select one or more items. You may select a parent SKU to include all its variants, or specific variants individually. Press the **Import Selected** button to import those items.

Name						SKUs	☐
ZIP1						0	☐
DENIM1						4	☒
SKU	Name	Color	Size	Price	Sync Status		
DENIM1BLKO/S	DENIM1	BLK	O/S	\$250.00	New	☒	
DENIM1BLKOS	DENIM1	BLK	OS	\$150.00	New	☒	
DENIM1BLUO/S	DENIM1	BLU	O/S	\$144.00	New	☒	
DENIM1BLUOS	DENIM1	BLU	OS	\$133.00	New	☒	

Printing tags for products

From the Products tab, you can also select specific products or variants and print tags for those products. Pressing **Print Selected** will bring you to the Print Jobs page where you can specify quantities, select a printer and label layout, and print or postpone the job.

You can also print from the Compare&Sync tab.

NOTE: Property mappings

Currently we have hardcoded the following properties for product import. We plan to implement configurable mapping in the future.

Simple RFID Property	ApparelMagic Property
Color	attr_2
Size	size
Price	label_price (fallback: price)
Category	category
Name	style_number
Sku	sku_alt (fallback: sku_concat)
Barcode	upc_display
