

ApparelMagic: Setting up the integration

To connect Simple RFID to ApparelMagic, you'll need your account ID and an API Key from ApparelMagic.

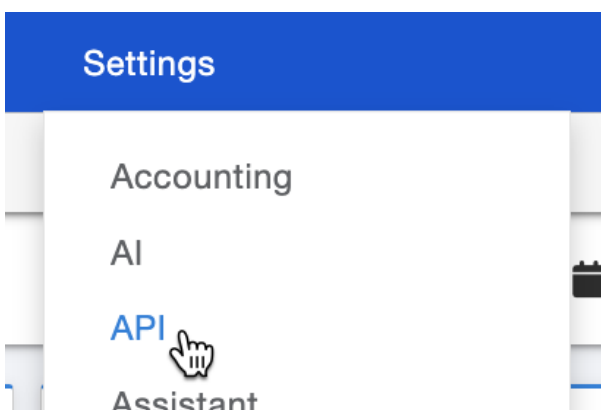

1. Determine your Account ID

When logged into ApparelMagic, your Account ID makes up the first part of the URL as shown here:

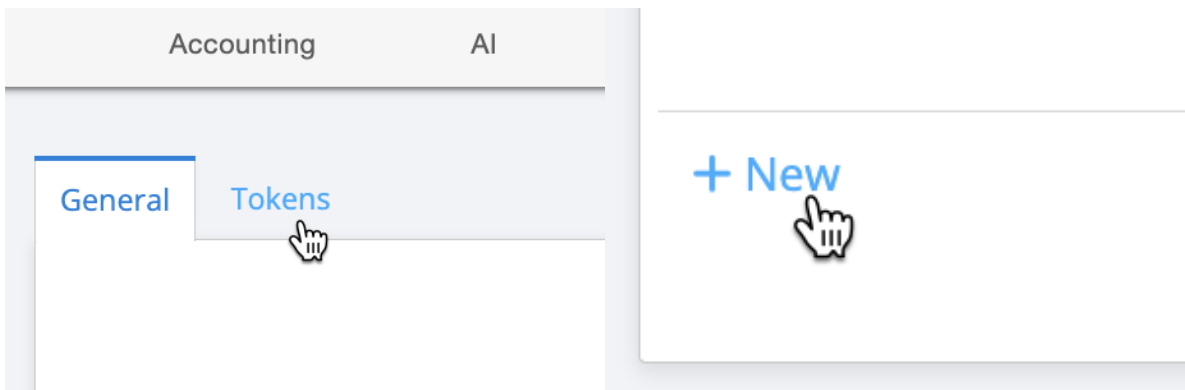

2. Generate an API Key

In ApparelMagic, navigate to Settings > API.

In the top-left of the page, open the **Tokens** tab, then press **+ New** at the bottom-left:

Give the token a description, like "Simple RFID". Make a note of the Token (you'll enter this in Simple RFID) then press **OK**.

A screenshot of a dialog box titled 'API Tokens'. It has two input fields. The first field is labeled 'Description' and contains the text 'Simple RFID'. The second field is labeled 'Token' and contains a long alphanumeric string: '677d5b0bddf47831acc0a25960782fe8'. At the bottom right of the dialog box, there are two buttons: 'OK' and 'Cancel'. A mouse cursor is pointing at the 'OK' button.

Last, make sure to press **Save** at the bottom-right of the page.

3. Enter your Account ID and API Key

With this information collected, enter your ApparelMagic Account ID and API key in the Customer Profile page in Simple RFID, then press **Save**:
