

Shopify: Import Sales orders

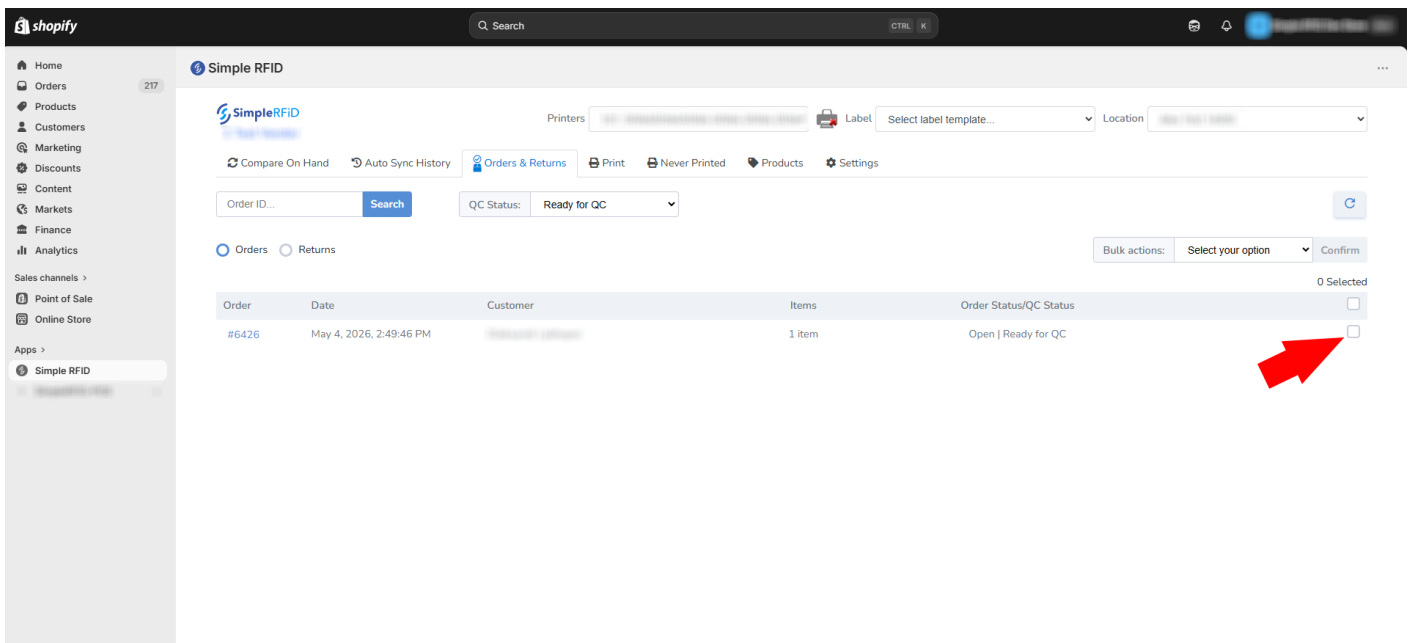

Importing orders from Shopify to Simple RFID

Currently orders must be "submitted" to the mobile app for review. This limitation will be resolved in the near future.

After creating an order, go to Simple RFID app on Shopify and click **Orders & Returns**.

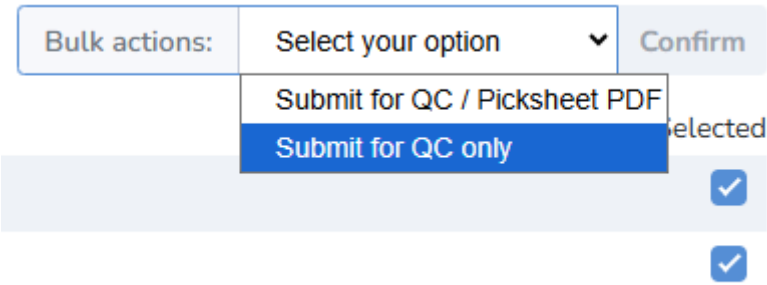

Select orders that need to be imported.

Select "Bulk Action" that is more suitable for your import process.

Submit for QC / Picksheet PDF will create a spreadsheet file that lists all the products included in the order.

Submit for QC only will simply submit the order to the review process.

Web Portal Sales Orders

Go to the [web portal](#) to see the new order under **Orders** tab.
