Mobile App: Review Mismatches

Create page for Review Mismatches on mobile once completed.

Mobile App: RFID Actions (Pending Actions)

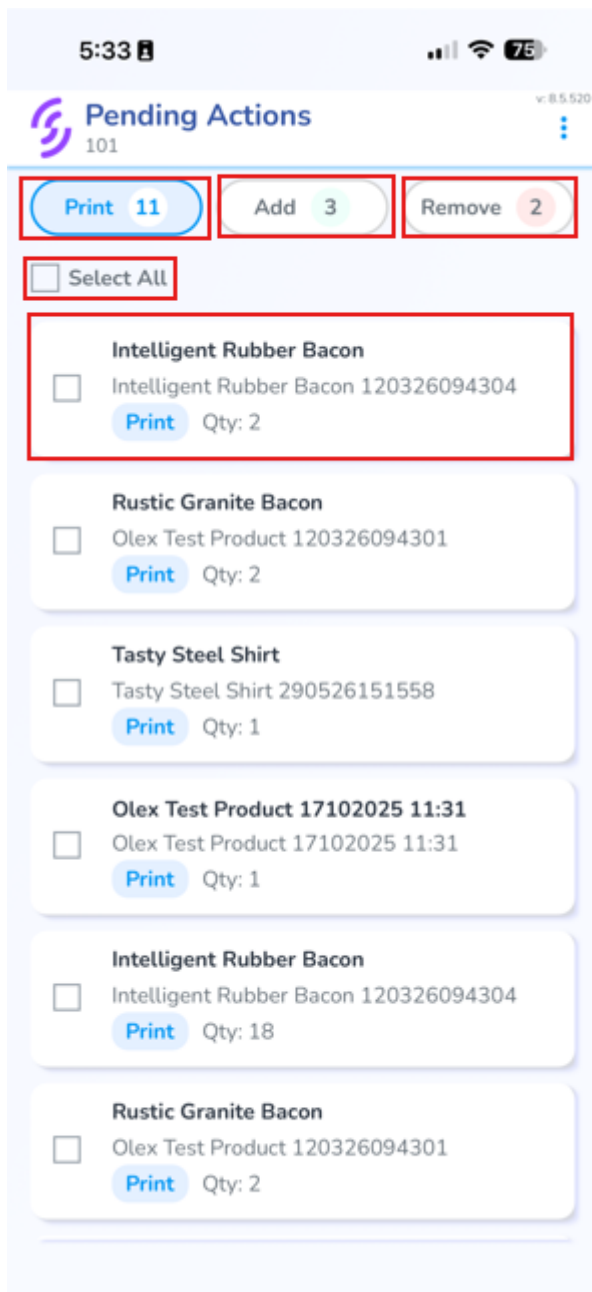

Once items are processed through the Mismatch Review page, actions are generated to realign the RFID and Partner quantities. If the actions involve RFID Actions the mobile user will follow this flow:

Pending Actions

- Open the mobile app
- Click on the Pending Actions tab

Pending Actions tab (Mismatch Review)

Choose a single product, or use the checkboxes on the left to choose multiple

Individual Product View

To view details of any Pending Action, click on the card:

AUDIT & RESOLUTION

Reason	New Inventory Not Tagged
Audit Name	QA 3
Resolution Date	Apr 15, 2026

PRODUCT INFORMATION

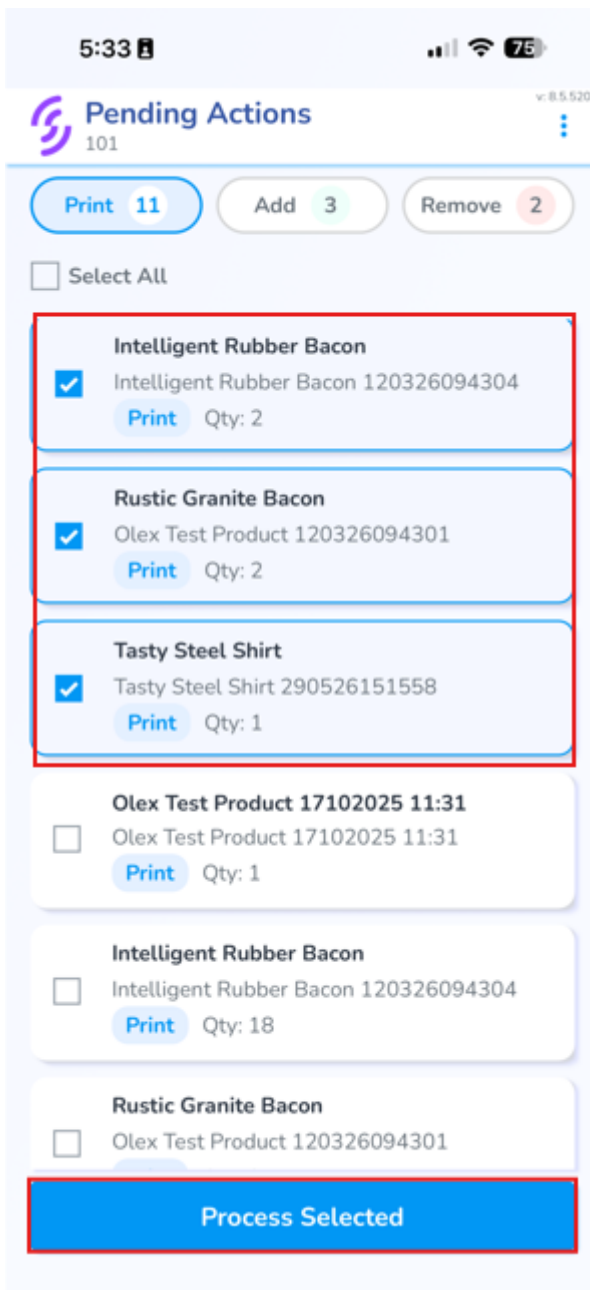

Product Name	Intelligent Rubber Bacon
SKU:	Intelligent Rubber Bacon 120326094304
UPC	5100660353241
Quantity	2

ACTION DETAILS

Action Type	Print
Status	Ready to print
Action description	Print and attach RFID tags, then rescan
Location	101

Printing

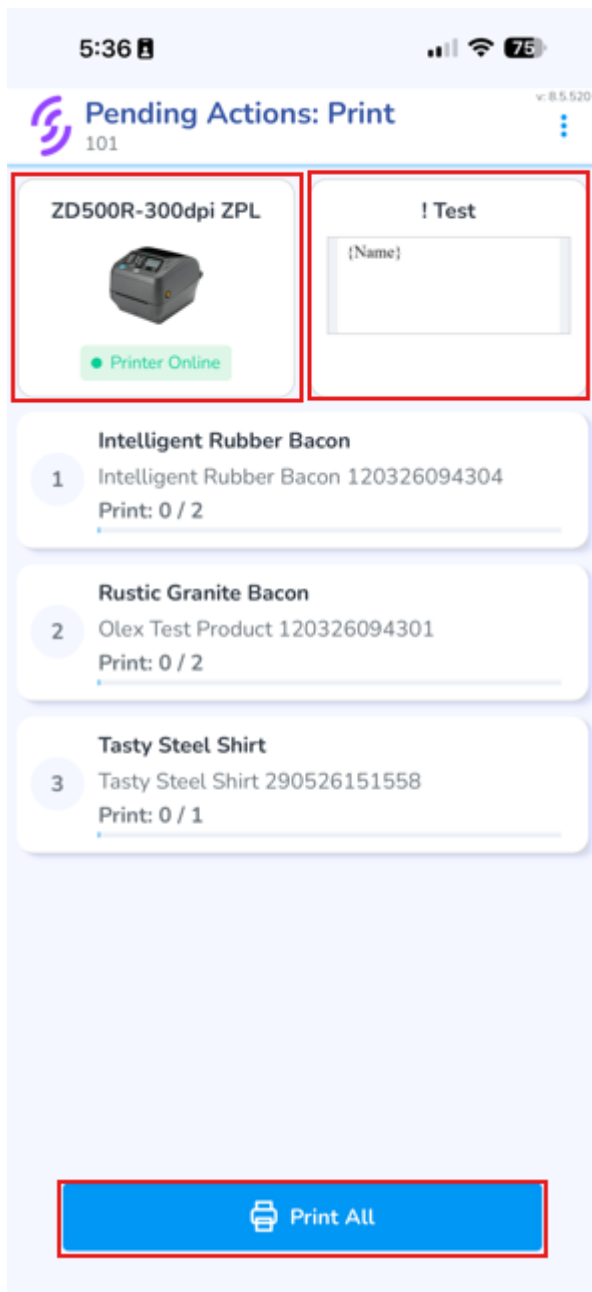

All printing tasks are grouped under Print. This window also displays the number of products which are pending print.

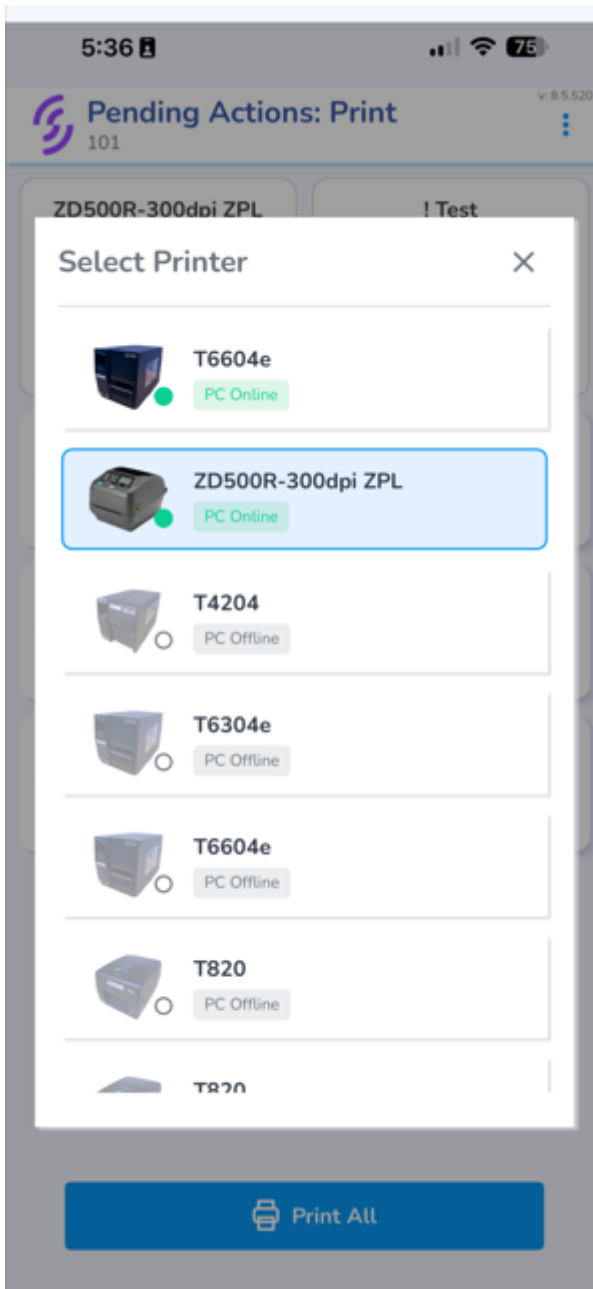

- Select one or more checkboxes
- Click "Process Selected"

Print Dialog

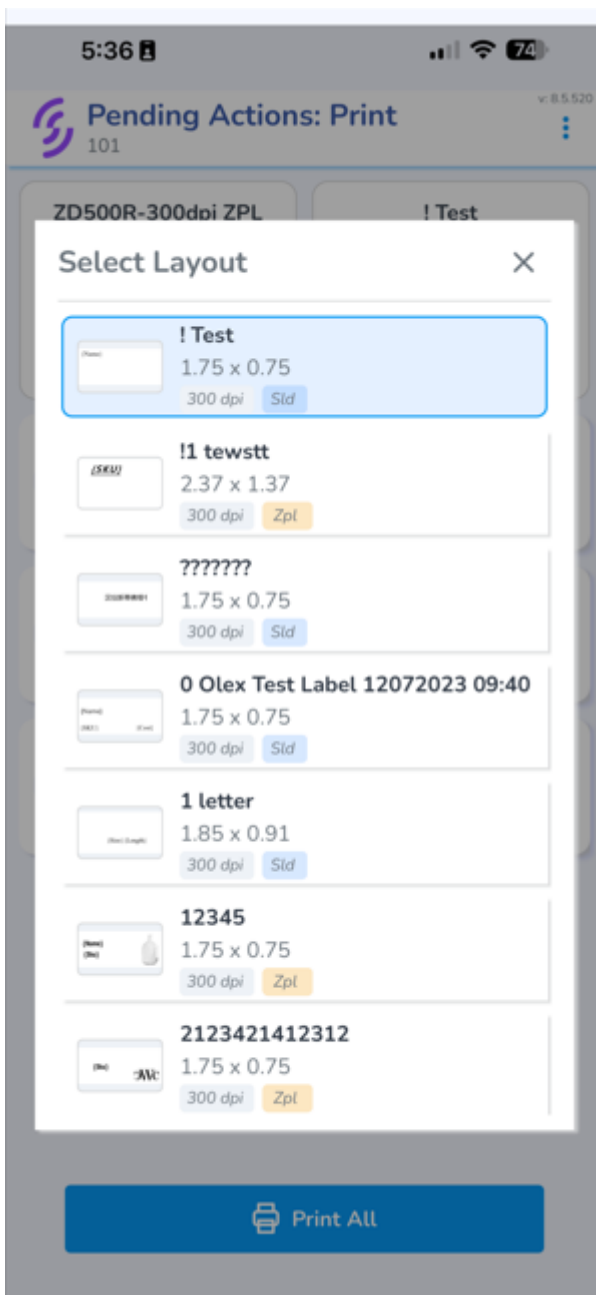

From the print page the user sees the printer they will be printing to, and label design the print job will use.

To choose a different printer click the image of the printer.

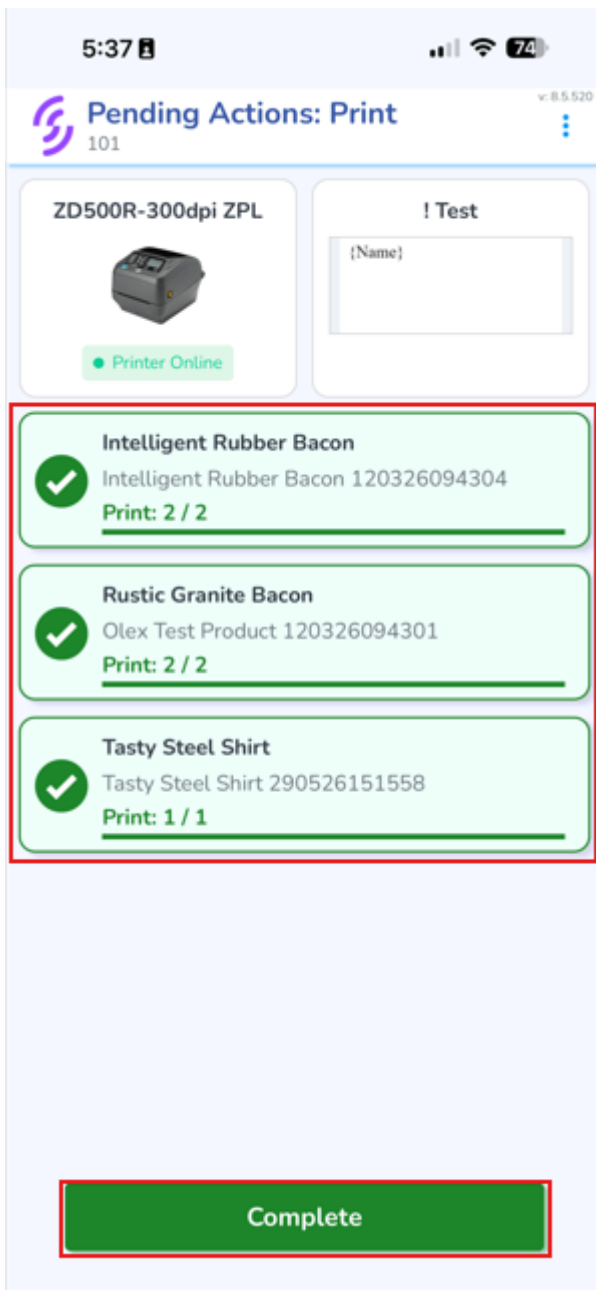

To choose a different label design template click on the Label Design.

Click **Print All** to initiate the print job.

As tags are printed the screen updates the number printed against expected.

Once the print job has been completed, click "Complete" to end the print process and return to the list view.

Add Scans

Once needed labels have been printed an "Add Scan" task will be generated. The Add scan list represents all items which have been printed and are ready to be scanned and added to inventory.
