

Create Product with Case Quantities

Products can be created which represent more than 1 item. This can represent a case pack, or any packaging with multiple items.

To create a case pack simply create the SKU from the Products tab

Edit the "Items Per Case" quantity from the default of "1." In the below example the quantity is 20, so each time the tag is scanned it will generate a quantity of 20.

Once you have printed tags for these items, edit these case quantity values from a specific serialized tag (ISN) from the [Inventory Tag level view](#)

Products > Edit product
