

Fonts

Use any font desired to print labels. Added fonts appear in the Fonts drop-down inside the Label Designer.

Adding New Fonts

If your desired font is not available please email support@simplerfid.com and advise on the font you wish to use. To be used a font must be in TTF or OTF file format.

Choose Font

- To select the desired font navigate to the Label Layouts page
- Open the template you wish to edit.
- Click on the text object you wish to edit.
- On the right side click the Font" drop-down
- Choose the desired font
- Click Save

image.png

Please note that the new font won't appear in the preview, however it will print on the label. Our next improvement will display this new font in the label design template.

Revision #3
